for the Year 1944.

To, The Chairman and Members of the Frinton and Malton Urban District Council.

Ladies and Gentlemen,

I have the honour of presenting my Annual Report on the Health and Sanitary condition of the District during 1944.

This is another War-time report and is therefore a limited one and contains only a few essential statistical details.

The Health of the District has been up to the usual satisfactory standard, the incidence of Infectious Disease has been low and there were no circumstances seriously affecting the Health of the inhabitants.

Mr. Holmes, Surveyor, continued to act as Sanitary Inspector in the absence of Mr. Gray on War Service, his report is attached.

The population for 1944 supplied by the Registrar General is 4,600

#### General Statistics.

<u>Live Births.</u>	Total	Male.	Female.
Legitimate	69	43	26
Illegitimate	5	3	2
Birth Rate per 1,000 of the population			16

#### Stillbirths.

Rate per 1,000 of the population - -

#### Deaths.

Death Rate per 1,000 of the population 38 18

#### Puerperal Deaths.

1. Puerperal Sepsis
2. Other Puerperal Causes

Rate per 1,000 births.

Nil  
Nil  
-

#### Death Rate of Infants under 1 year.

All infants per 1,000 live births 67.5

Legitimate per 1,000 legitimate live births 72.4

Illegitimate per 1,000 illegitimate live births Nil

Cancer Death Rate

Deaths from Measles

Deaths from Whooping Cough

Deaths from Diarrhoea (under 2 years)

Pulmonary Tuberculosis Death Rate

Other Tuberculosis Death Rate

## Death and Infectious Disease in Districts.

	Printon	Walton	Kirby	Gt Holland
Total Deaths	17	38	20	10
Infant Deaths	1	-	3	1
Scarlet Fever Notified	-	3	-	1
Diphtheria Notified	-	-	-	-
Enteric Fever Notified	-	-	-	-
Pneumonia Notified	2	1	1	-
Erysipelas Notified	-	-	1	-
Measles Notified	-	2	1	-
Whooping Cough Notified	13	28	4	2
Cerebrospinal Fever	-	-	1	-
Jaundice	1	2	-	-

## Infectious Disease 1944.

	Total Notified	Admitted hospital	Total Deaths.
Scarlet Fever	4	1	-
Pneumonia	4	-	4
Erysipelas	1	-	-
Measles	3	-	-
Whooping Cough	47	-	-
Cerebrospinal Fever	1	1	1

With the exception of a number of cases of Whoopingcough in the early part of the year, the incidence of Infectious Disease was low. There were no cases of Diphtheria or Enteric Fever and only 4 mild cases of Scarlet Fever, 3 of which were treated at home.

# Tuberculosis 1944.

## New Cases.

## Deaths.

Age Period.	Respiratory		Non Respiratory.		Respiratory		Non Respiratory.	
	M.	F.	M.	F.	M.	F.	M.	F.
0	-	-	-	-	-	-	-	-
1	-	-	-	-	-	-	-	-
5	-	-	-	1	-	-	1	-
15	-	-	-	-	-	-	-	-
25	-	-	-	1	-	-	-	-
35	1	1	-	-	-	-	-	-
45	-	-	-	-	-	-	-	-
55	-	-	1	-	-	-	-	-
65 & upwards	-	-	-	-	-	-	-	-
	1	1	1	2	-	-	1	-

The number of cases of Tuberculosis on the Register at the end of 1944 was:-

### A. Pulmonary Tuberculosis.

1. Male 4  
2. Female 5

### B. Non-Pulmonary Tuberculosis.

1. Male 4  
2. Female 6  
19

One non-pulmonary case died during the year. No action under the Public Health (Prevention of Tuberculosis) Regulations or the Public Health Act 172 was required.

### Immunisation.

Immunisation against Diphtheria was carried out on the lines of previous years but parents are not taking advantage of the facilities offered as they should, at the end of the year approximately 46% of children under 5 years of age and 60.1% of children between the ages of 5 and 15 years had been inoculated. These figures are not good enough if efficient protection to the community is to be attained.

### Port Sanitation.

No action under the Port Sanitary Regulations was required.

I am,

Your obedient servant,

(Signed.) W.A. Milne,

(Medical Officer of Health.)

	<u>No. of</u> <u>Containers</u>	<u>Weight in</u> <u>lbs.</u>
Tinned meat	42	74 $\frac{1}{2}$
" fish	51	34 $\frac{1}{2}$
" milk	100	92 $\frac{1}{2}$
" fruit	6	12 $\frac{1}{2}$
" soup	4	2 $\frac{1}{2}$
